

Programmable Automatic Biopsy System

- One-handed design simplifies loading and operation whilst allowing for convenient manipulation of the ultrasound transducer
- Programmable: releases the stylet allowing time for tissue to settle in notch (ideal for denser tissue or when there is a desire to verify notch position), and activates the cutting cannula
- 20mm sample notch and thin-wall cannula for larger core
- Colour coded for quick gauge size identification
- Depth markings etched on cannula for precise positioning
- The Coaxial outer needle permits multiple biopsies (US and CT guided)
- Commonly used for Breast biopsy procedure
- Loaded status red indicator
